Hi Everyone,

I think the letter is very good. However, I did an analysis slightly differently than Kevin's. I looked at all of the historical data in the report for the Ohio homes. I came up with the same top three homes to sample in Ohio, but the last two are different. Please see the attached spreadsheet. I wanted to look at all of the historical data because once PFOA stopped being produced, the concentration in the water is somewhat reliant on the rain. Because of the odd weather patterns lately, that might remove an air pollution trend we need to see. Granted, this analysis didn't make a huge difference, but I did it to see what I would get.

For the PWSs, I agree with Little Hocking and Belpre.

Finally, I will be out of the office tomorrow morning, but I will be back in the afternoon. However, I have a couple meetings in the afternoon and my responses may be slow.

Have a good night,
Jenny

Subject: Chemours Letter; request for GenX sampling at Washington Works

Attached is our draft letter to Chemours, requesting the sampling of selected water supplies in West Virginia and Ohio for GenX. Please provide your suggested edits, additions and changes. Thank you.

Roger, Andy and Kevin
